

Check-in, payment & fish — who decides, where, and with what tool

Two decisions belong to the **group lead** — **who pays for add-ons** and **how each guest's fish is handled**. Each is made in the **portal**, or completed **at check-in** if it wasn't done before arrival. When the lead makes a guest responsible for a payment or for part of the fish, that guest's own portal gets the tasks to **confirm** — including a required **FedEx risk disclaimer**. This maps every step to its tool and status.

THE FLOW

Phase 1

The lead decides

GROUP LEAD

Who pays for what

Per guest, sets the payer for **activities**, **spa & massage**, and **alcohol** — themselves, the lead, or another guest.

✓ HAVE

Tool · **Payment Responsibility** — `payment-responsibility.html`

IN THE PORTAL

AT CHECK-IN — IF NOT DECIDED

How fish is managed

Splits the group's catch into take-home shares by guest, and assigns who bears each share's **processing cost**.

⚙️ EXTEND

Tool · **Fish Processing** + portal fish tile — `fish-processing.html`

IN THE PORTAL

AT CHECK-IN — IF PORTAL NOT FILLED BEFORE ARRIVAL

Confirm payment responsibility

Sees the exact charges routed to them (their own + any the lead assigned) and a folio total, then confirms responsibility.

[+ BUILT NOW](#)

Tool · **Guest Confirmations** – `guest-confirmations.html`

[THEIR PORTAL](#)[FINISHED AT CHECK-IN IF NEEDED](#)

Confirm fish handling

Chooses **take with me on the plane** or **ship via FedEx** for their share.

[+ BUILT NOW](#)

Tool · **Guest Confirmations**

[THEIR PORTAL](#)[FINISHED AT CHECK-IN IF NEEDED](#)

FedEx risk disclaimer — read & accept

Choosing FedEx reveals the disclaimer; the guest must tick “**I have read and accept this risk**” before it can be confirmed. Talon Lodge and the processor are released from liability; acceptance (who & when) is stored on the record.

[+ BUILT NOW](#)

Tool · **Guest Confirmations** – gated & logged

[THEIR PORTAL](#)

Charges land on the right folio

Every activity / spa / alcohol charge routes to the assigned payer; checkout shows a **folio per payer** with the total to bill.

[✓ HAVE](#)

Tool · **Billing Report** – `billing-report.html`

Fish goes to the processor with the guest's choice

Each share is prepped to **take** or **ship**; FedEx shares carry the accepted disclaimer.

[⚙️ EXTEND](#)

Tool · **Fish Processing** – `consume guest choice`

— TO FULLY MANAGE THE PROCESS — THE WIRING LEFT

WHAT TO CONNECT NEXT

1. **Embed the three tools in the Guest Portal**, and expose the same two lead tools at the front desk — so “in the portal” and “at check-in if not decided” are literally the same tool in two places.
2. **One shared record.** The lead's choices must drive the guest's confirmation tasks and the billing folios from the same data — so a guest only sees confirmations for what they were actually assigned. (Standalone prototypes can't share across origins; the production DB / one-origin test hub closes this.)
3. **Extend Fish Processing** to (a) let the lead assign **cost responsibility** per share, and (b) consume each guest's **take / FedEx** choice for the processor and shipping list.
4. **Check-in “not done yet?” gate.** On arrival, if the portal is incomplete, the desk runs the very same Payment Responsibility, Fish, and Confirmation tools to finish it with the guest.
5. **Log the FedEx disclaimer acceptance** (guest, timestamp, wording version) on the guest record for liability, and surface it on the processing sheet.
6. **Finalize rates.** Real spa treatment prices, activity rates, alcohol line items, and the fish-processing fee so folio totals are live, not indicative.
