

The look & feel

The single source of truth for colour, type, spacing, and shape — drafted from the guest-portal and reservation prototypes. Every screen reads from these tokens, so the palette below is the one decision that everything else inherits.

* Light

C Dark

● System

01 Colour

Change a token → the whole app follows. Dark mode is a re-themed palette, not an inversion.

Source — talon-lodge-design prototypes · drafted for `talon-app2026-ui/src/_talon-tokens.scss` (Andy's naming convention). Reconcile against the repo copy once access lands.

Open decisions — brand display typeface (empty brand/fonts/, currently system sans) · final teal · dark-mode surfaces · whether Daxa reads these tokens directly.

Rule — colours & sizes come from tokens, never hand-written in a component (`npm run lint:style`). Wording lives in `public/i18n/en.json`.
